PROFESSIONAL SUMMARY

Azure DevOps Engineer with 5 years of experience across cloud infrastructure, CI/CD automation, application deployments, platform operations, and production support. Hands-on experience with Microsoft Azure, GitLab CI/CD, Terraform, Kubernetes (AKS), Docker, Helm, and Azure Container Registry (ACR). Experienced in supporting production releases, managing change approvals, troubleshooting infrastructure and pipeline issues, and collaborating with development, QA, security, and client teams. Contributed to container-artIfact migration from JFrog to ACR and supported enterprise platforms and high-volume retail events. Microsoft Certified: Azure Administrator Associate (AZ-104). Open to relocation across the UAE.

CORE TECHNICAL SKILLS

Cloud & Azure: Microsoft Azure, Azure Kubernetes Service (AKS), Azure Container Registry (ACR), Azure Virtual Machines, Storage, Key Vault, Azure networking

CI/CD & DevOps: GitLab CI/CD, Azure DevOps, pipeline automation, deployment workflows, approvals, Git, merge requests, branch protection

Infrastructure as Code: Terraform, reusable modules, state management, init/validate/plan/apply workflows, Azure CLI

Containers & Platforms: Kubernetes, AKS, Docker, Helm, container image management, GitLab platform operations

Networking & Security: VNets, subnets, NSGs, routing, private connectivity, RBAC, access control, secrets management

Monitoring & Operations: New Relic, PagerDuty, alerting, incident response, log analysis, root-cause analysis, production troubleshooting

Collaboration & Tools: Jira, Agile/Scrum, change management, release coordination, Keycloak, Consul, Vault, SonarQube, Artifactory/Xray

PROFESSIONAL EXPERIENCE

INFOSYS LIMITED | Azure DevOps Engineer | May 2023 – Present

Project: Currys UK – E-commerce platform

- Managed and support Microsoft Azure infrastructure across multiple environments, focusing on stability, security, scalability, and production readiness.
- Automated infrastructure provisioning and lifecycle management using Terraform and GitLab CI/CD, following Infrastructure as Code practices.
- Developed and maintain CI/CD pipelines for infrastructure and application deployments, including validation, approvals, deployment, and troubleshooting.
- Used Terraform init, validate, plan, and apply workflows to manage Azure resources in a controlled manner.
- Supported AKS and containerized applications, troubleshooting deployments, services, ConfigMaps, secrets, storage, networking, and related resources.
- Maintained Helm-based deployment workflows and support consistent application releases across environments.
- Administered GitLab platform operations, including repositories, merge requests, runners, pipeline configuration, and pipeline troubleshooting.
- Supported Docker image workflows, image validation, registry management, and container deployment troubleshooting.
- Contributed to migration of container artifacts from JFrog repositories to Azure Container Registry (ACR), including transition and deployment validation.
- Managed Azure networking and access controls, including VNets, subnets, NSGs, routing, private connectivity, RBAC, and Key Vault integrations.
- Monitored platforms using New Relic and support incident response through PagerDuty; investigate issues using logs, events, and configuration reviews.
- Supported Kubernetes-hosted platform services including GitLab, Keycloak, Consul, Vault, SonarQube, and Artifactory/Xray.
- Coordinated with development, QA, security, infrastructure, and client teams on releases, change requests, production incidents, and operational improvements.
- Used Jira to track incidents, service requests, changes, and project deliverables; document findings and perform root-cause analysis for recurring issues.
- Supported platform monitoring and incident handling during high-volume retail periods, including Black Friday.

WIPRO LIMITED | Azure & Linux Administrator | October 2021 – January 2023

Project: British Airways UK – International airline

- Administered Microsoft Azure resources and Linux-based infrastructure in enterprise production environments.
- Provisioned, configured, maintained, monitored, and troubleshot Azure Virtual Machines.
- Performed Linux administration including user and group management, permissions, package updates, service management, and system maintenance.

- Monitored CPU, memory, disk utilization, server health, and service availability; investigated alerts and performance issues.
- Supported Azure networking, including VNets, subnets, NSGs, public and private IPs, and connectivity troubleshooting.
- Performed operating-system patching, configuration changes, routine maintenance, and health checks in line with change procedures.
- Investigated Linux, VM, application, network, and service issues using logs and root-cause analysis.
- Supported backup, recovery, production deployments, environment validation, and post-implementation checks.
- Managed incidents and service requests in line with SLA requirements and collaborated with application, database, network, and infrastructure teams.
- Maintained operational documentation and followed incident, change, release, and problem-management processes.

ADDITIONAL TECHNICAL EXPOSURE & HANDS-ON LEARNING

The following reflects structured learning, hands-on labs, and capstone work rather than claimed production ownership:

- AWS fundamentals, including compute, storage, networking, Regions, Availability Zones, and EKS concepts.
- Hands-on learning with Jenkins and GitHub Actions for build and deployment automation.
- Observability concepts using Prometheus, Grafana, and ELK for metrics, dashboards, and centralized logging.
- DevSecOps learning with SonarQube, Trivy, vulnerability scanning, secrets management, and secure CI/CD concepts.
- Kubernetes and service-mesh learning covering EKS, Helm, Istio, traffic routing, and mTLS concepts.
- AI-assisted DevOps practice for log analysis, troubleshooting, YAML/Terraform generation, and root-cause analysis.

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Generative AI – Infosys Internal Certification

AWARDS & RECOGNITION

- INSTA Award for round-the-clock client support and troubleshooting.
- INSTA Award for responsiveness to client requirements.
- Currys Warrior recognition for supporting peak sales periods and collaborating with client teams.

EDUCATION

B.Com Computers | Shantiniketan Degree College | Mahatma Gandhi University | 2018
