PROFESSIONAL SUMMARY

Azure DevOps Engineer with 5+ years of experience supporting enterprise cloud infrastructure, CI/CD automation, Infrastructure as Code, Kubernetes platforms, and production operations. Hands-on experience across Microsoft Azure, Azure DevOps, GitLab, Terraform, Docker, and Kubernetes, with strong focus on repeatable infrastructure delivery, secure automation, platform reliability, and troubleshooting. Experienced in managing Azure resources through GitLab CI/CD and Terraform, supporting Kubernetes/AKS workloads, monitoring production environments with New Relic, coordinating incidents through PagerDuty, and managing delivery work through Jira. Experienced in artifact-platform migration from JFrog to Azure Container Registry (ACR) and in supporting enterprise platform services and cloud operations.

CORE COMPETENCIES

Azure Cloud & Infrastructure	Azure DevOps & GitLab CI/CD	Terraform & IaC	Kubernetes / AKS & Docker
CI/CD Pipeline Automation	Azure Networking & Security	Monitoring & Incident Response	Production Troubleshooting
Artifact Management & ACR	Git, GitLab & Branching Strategies	Jira / Agile Delivery	Cloud Platform Operations

TECHNICAL SKILLS

Cloud: Microsoft: Azure, AWS (Beginner), Azure Kubernetes Service (AKS), Azure Container Registry (ACR), Storage, Key Vault, Networking
DevOps & CI/CD: Azure DevOps, CI/CD, GitLab administration, pipeline automation, deployment workflows, approvals, service integrations
IaC & Automation: Terraform, reusable modules, terraform state, plan/apply workflows, Azure CLI, scripting and automation
Containers: Kubernetes, AKS, Docker, Helm, container lifecycle management, troubleshooting, image management
Networking & Security: VNets, subnets, NSGs, private connectivity, routing, access control, secrets management, RBAC
Monitoring & Operations: New Relic, PagerDuty, production monitoring, alerting, incident response, root-cause analysis.
Source Control & Collaboration: Git, GitLab, merge requests, branch protection, Jira, Agile/Scrum
Platform Services: Key-cloak, SonarQube, Artifactory/Xray, platform tooling

PROFESSIONAL EXPERIENCE

Azure DevOps Engineer at INFOSYS Limited

May 2023 - Present

Project: CURRYS-UK | E-commerce platform

Client: Currys is the UK's largest consumer electronics and electrical appliance retailer, offering omnichannel shopping across over 691 stores and online. Founded in 1884 Leicester by Henry Curry as a bicycle manufacturer before expanding into household electronics

- Manage and automate Azure cloud infrastructure using Terraform and GitLab CI/CD, enabling consistent and repeatable deployments across environments.
- Design, maintain, and troubleshoot CI/CD pipelines for infrastructure and application delivery, including validation, planning, approvals, and deployment workflows.
- Support Kubernetes/AKS platforms and containerized workloads, including deployments, services, configuration, secrets, storage, networking, and production troubleshooting.
- Administer and support enterprise GitLab platform capabilities, including repositories, CI/CD configuration, runners/self-hosted agents, pipeline troubleshooting, and platform operations.
- Implemented and supported artifact migration from JFrog-based repositories to Azure Container Registry (ACR), improving alignment with the Azure container platform.

- Monitor Azure and Kubernetes environments using New Relic and support production incident response through PagerDuty, with root-cause analysis and service restoration.
- Work with Jira for incident, change, and delivery tracking while collaborating with development, infrastructure, and application teams.
- Support Azure networking and security components including resource groups, VNets, subnets, NSGs, private connectivity, Key Vault integrations, and access controls.
- Troubleshoot production issues across CI/CD, Terraform, Kubernetes, container images, Azure infrastructure, and application dependencies.
- Support platform services and tooling running on Kubernetes, including GitLab, Keycloak, Consul, and related operational components.
- Supported Azure infrastructure provisioning and operational activities using Infrastructure as Code and CI/CD automation.
- Developed and maintained deployment workflows for cloud resources and applications, improving consistency and reducing manual intervention.
- Worked with Git-based source control, Linux, Docker, Kubernetes, and scripting as part of day-to-day DevOps operations.
- Performed production troubleshooting, log analysis, deployment validation, and incident coordination with cross-functional teams.
- Contributed to monitoring, change management, release activities, and operational documentation.

PROFESSIONAL EXPERIENCE

Azure & Linux Admin at WIPRO Limited

October 2021 – January 2023

Project: British Airways - UK | International Airlines

Client: British Airways is the principal flag carrier airline of the United Kingdom. Owned by the International Airlines Group (IAG) and serves as the national airline connecting Britain globally for over a century and flies to around 200 destinations across more than 65 countries globally.

- Managed Azure VMs, storage, networking, and other cloud resources.
- Performed Linux server administration, user management, permissions, and service management.
- Monitored server performance, resource utilization, and health system.
- Performed VM provisioning, patching, configuration, and maintenance.
- Troubleshot Linux, Azure VM, network connectivity, and application issues.
- Worked with Azure VNets, subnets, NSGs, and public/private IPs.
- Analyzed system logs and performed root-cause troubleshooting for incidents.
- Handled incidents and service requests while coordinating with application and infrastructure teams.

SELECTED IMPACT

- Automated Azure infrastructure delivery through Terraform and GitLab CI/CD.
- Supported enterprise Kubernetes platforms and production workloads across multiple environments.
- Contributed to migration of container artifacts from JFrog to Azure Container Registry.
- Improved operational visibility and incident response using New Relic and PagerDuty.
- Resolved CI/CD, Terraform, Kubernetes, and container-image issues affecting application availability.

CERTIFICATIONS

- **Microsoft Certified: Azure Administrator Associate (AZ-104)**

Certification reference: Microsoft Learn – Azure Administrator Associate / Exam AZ-104

- **Generative AI**

Certification reference: Infosys Internal

ACHIVEMENTS & AWARDS

- ✓ INSTA awards round clock availability to the client to troubleshoot DevOps issues.
- ✓ INSTA award for quick responses to the client requirements.
- ✓ CURRYS WORRIER for supporting the peak sales and collaboration with client visits.

EDUCATION

B.com Computers | Shantiniketan Degree college | Mahatma Gandhi University | 2018
